EDUCATION

Monash University

Bachelor of Software Engineering (Honours)

Melbourne, VIC, Australia

Jan. 2024 – Expected 2028

SELECTED ACHIEVEMENTS

UNI HACK 2026 | *6th of 183 teams at a 1,000+ participant university hackathon*

Mar. 2026

TECHNICAL EXPERIENCE

Software Engineering Intern

Jul. 2026 – Nov. 2026

Coles Group – Identity & Access Management

Melbourne, VIC

- Support enterprise IAM systems for thousands of Coles employees across Microsoft Azure, Active Directory, and Microsoft Entra ID (Azure AD)
- Contribute to identity lifecycle automation, account provisioning, access governance, and enterprise cybersecurity operations

Full-Stack Project Officer

Oct. 2025 – Present

Monash Association of Coding (MAC) – Australia's largest university coding club

- Ship full-stack features across **monashcoding.com** and the **MAC Job Board**, supporting event discovery, sponsorship visibility, recruitment, and student career access
- Maintain Job Board features for a live careers product serving **1,000 monthly visitors** and indexing roughly **1,440 scraped job listings**
- Collaborate with technical and non-technical teams to scope, implement, review, and release product improvements

Autonomous Vehicle Software Engineer

Mar. 2025 – Dec. 2025

Monash Connected Autonomous Vehicle (MCAV) – ESDA Team

- Built ROS2 Python nodes for LiDAR and ZED stereo-camera processing on a custom electric autonomous vehicle that placed **1st in the Design Competition** at IGVC 2025

SELECTED PROJECTS

MAC Job Board | *Next.js, TypeScript, Tailwind CSS, Product Analytics*

[Live]

- Developed a student careers board connecting Monash students with internship, graduate, and technology roles from industry partners
- Scaled discovery for roughly **1,440 scraped job listings** with searchable listings, role tags, filters, and responsive job cards for high-volume browsing
- Used analytics from **1,000 monthly visitors** to prioritize navigation, filtering, and mobile UX improvements around real student traffic

BeeSafe | *TanStack Start, React 19, YOLOv8, MediaPipe, AWS, PostgreSQL*

[Devpost]

- Built a web-native driving safety platform in **48 hours** at UNI HACK 2026, placing **6th of 183 teams**
- Implemented real-time in-browser computer vision with MediaPipe and YOLOv8 via ONNX Runtime and WebGPU for driver drowsiness and road-hazard detection
- Engineered crash detection from mobile motion and G-force signals, triggering emergency calls with GPS coordinates and AWS Polly voice alerts

MAC Website Redesign | *Next.js, TypeScript, Tailwind CSS, Framer Motion*

[Live]

- Contributed to a ground-up rebuild of monashcoding.com, the public-facing site for Australia's largest university coding club
- Implemented reusable section components and Framer Motion reveal patterns across event, membership, sponsorship, and recruitment pages

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, Kotlin, SQL, HTML/CSS

Frameworks / Platforms: React, Next.js, Tailwind CSS, TanStack Start, ROS2, Android SDK

Tools: Microsoft Azure, Microsoft Entra ID / Azure AD, Active Directory, AWS, PostgreSQL, Git/GitHub, Linux

Concepts: Identity and Access Management, Identity Management, Cybersecurity, Full-Stack Development, Data Structures and Algorithms, Accessibility, Agile Practices
